

# XDA

Small dimensions, big performance  
Ideal for orchards, vineyards and all row cultivation

**New**

Adjustable side conveyors in stainless steel

The XDA fertilizer spreaders are compact and light and can be pulled by low-power tractors. However, they have the same sturdiness and high precision as large agricultural machinery. One of their distinctive features is quantity control through a setting gauge which guarantees accurate fertilizer distribution. If necessary, it is possible to adjust the quantities being fed onto the 2 spreading discs. The side conveyors allow for localized spreading on row cultivation of 1.5 - 5 meters: the deflectors are adjustable and enable the fertilizer to be discharged where it is needed, thus avoiding unnecessary waste.

Models	Capacity (l)	Maximum load (kg)	Weight (kg)	Length (cm)	Hopper width (cm)	Height (cm)
XDA 500	500	600	160	111	143	98
XDA 750	750	600	175	111	143	120

**All models are equipped with:** Manual flow control – Standard filtering grids – PTO shaft – Rear guard – Stainless steel discs – Stainless steel vanes for spreading up to 18 m – Vanes quick adjustment – Fast lubrication system of the transmission

**OPTIONALS:** Double acting hydraulic control – Dual fertilizer conveyor
