

Adjustable side conveyors in stainless steel

The SDA fertilizer spreaders are compact and light and can be pulled by low-power tractors. However, they have the same sturdiness and high precision as large agricultural machinery. One of their distinctive features is quantity control through a setting gauge which guarantees accurate fertilizer distribution. If necessary, it is possible to adjust the quantities being fed onto the 2 spreading discs. The side conveyors allow for localized spreading on row cultivation of 1.5 - 5 meters: the deflectors are adjustable and enable the fertilizer to be discharged where it is needed, thus avoiding unnecessary waste.

Models	Capacity (l)	Maximum load (kg)	Weight (kg)	Length (cm)	Hopper width (cm)	Height (cm)
SDA 500	500	800	154	112	110	94
SDA 600	600	800	163	112	110	104
